PulseIQ HR Analytics

Phase 3 — Finance, Department Performance, AI Insights and Executive Reporting

Project detail	Value
Prepared by	Shivam Kumar
Project	PulseIQ HR Analytics
Repository	ShivamSingh1208/Data-Analytics_project
Reporting period	April 2025 – September 2026, unless otherwise stated
Forecast horizon	October 2026 – March 2027
Report date	3 November 2026

Executive summary

Phase 3 extends the PulseIQ warehouse and Superset reporting with profit and loss analysis, receivables ageing, cash movement, department-level performance, payroll anomaly screening, forecasts and an executive KPI scorecard. The work includes five documented analysis workstreams and four published Phase 3 dashboards.

Key results: the FY 2025–26 official P&L reports revenue of INR 790.16 million and profit of INR 135.16 million. At the reporting cutoff, 62 issued open invoices total INR 139.39 million. Cash movement over 18 months is net positive by INR 1,233.52 million. The department mart contains 198 department-month rows, and its attendance calculation now reconciles to the reference within 0.01 percentage points.

Important caveats: an INR 18,450 June 2026 salary-ledger difference remains unexplained and requires Finance review. Department target breaches remain visible even when overall KPIs meet their targets. Anomaly categories can overlap, and model forecasts are estimates requiring human review.

Phase 3 deliverables

Task	Workstream	Dashboard / output
11	Profit and loss analysis	PulseIQ Finance & P&L; Dashboard
12	Receivables and cash movement	Receivables & Cash Dashboard
13	Cross-department impact	Department Performance Dashboard
14	AI insights and forecasts	AI Insights & Forecast Dashboard
15	Executive KPI scorecard	Executive Scorecard Dashboard

Task 11 — Profit and Loss Analysis

Method and reconciliation

Revenue is calculated as ledger credit minus debit; expenses as debit minus credit. Only detail accounts are included to avoid parent-account double counting. Expense category and vendor analysis uses expense-bill amounts excluding GST and is not added again to ledger P&L.

Period	Revenue (INR)	Expenses (INR)	Profit (INR)
FY 2025–26	790,160,535.00	655,004,422.46	135,156,112.54
Apr–Sep 2026 official	470,769,517.00	381,242,041.96	89,527,475.04
Apr–Sep 2026 ledger	470,769,517.00	381,260,491.96	89,509,025.04

June 2026 payroll reconciliation exception

Payroll earned fixed pay and ledger account 5001 (Salaries & Wages) match in 10 of 11 departments. D01 payroll earned fixed pay is INR 19,873,074.18, compared with an account 5001 ledger debit of INR 19,891,524.18. The unexplained excess is INR 18,450. Employer cost agrees with the reference across departments; overtime and incentive accounts reconcile. The cause remains unresolved and requires Finance review. No source data has been adjusted.

Business findings

1. Revenue rose 11.1% from March to April 2026, while expenses rose 20.7%; net profit fell 26.0% and margin declined from 20.60% to 13.72%.
2. Incentives and Bonus increased by INR 9,467,647.06; Salaries and Wages by INR 3,630,082.51; and Insurance by INR 2,120,000.00.
3. Professional Fees includes a manual INR 1.8 million credit journal (MJ-0002) dated 1 April 2026. After an INR 448,840 expense debit, the category shows net expense of negative INR 1,351,160. Finance should confirm the journal's purpose and supporting evidence.

Expense bills analysed: 501, totalling INR 168,245,930 excluding GST. Category and vendor rankings are based on these bills, not added to ledger P&L.

Task 12 — Receivables and Cash Movement

The receivables ageing mart reconciles exactly to issued open invoices in fact_invoice. It contains 62 issued open invoices with a balance of INR 139,394,278.

Ageing bucket	Invoices	Open balance (INR)
Not yet due	49	112,283,412
1–30 days	10	22,133,626
61–90 days	1	1,940,982
90+ days	2	3,036,258
Total	62	139,394,278

A further invoice, INV/2026-27/0217, is in DRAFT status with a balance of INR 1,028,724. It is correctly excluded from issued open receivables.

Cash movement

The monthly cash movement view covers April 2025 to September 2026. Cash inflows are recorded invoice payments; cash outflows are paid expenses. Both measures reconcile exactly to their source records in all 18 months.

Measure	Amount (INR)
Cash inflows	1,419,349,558.00
Cash outflows	185,831,316.70
Net cash movement	1,233,518,241.30

Interpretation: this is a receipts-and-paid-expenses view. It is not a substitute for accrual-basis profit and loss. Client payment-speed analysis is presented separately.

Task 13 — Cross-Department Impact

The department-month mart covers April 2025 to September 2026: 198 rows across 11 department IDs. Payroll, attendance, headcount, leave and task sources were aggregated independently before joining. Approved leave days are used; overtime cost is represented by overtime pay. Leave days per head and overtime share are separate measures.

Coverage and reconciliation

Payroll, attendance and headcount are populated across all 198 rows. Task metrics are missing for some department-months and remain NULL, not zero. D00 appears in the source view but is outside the 10-department target comparison.

The attendance mart uses the same half-day credit convention as the Phase 2 attendance metrics: **100 × (SUM(present_days) + 0.5 × SUM(half_days_unpaid)) / SUM(scheduled_days)**. Against the reference summary, all 198 of 198 rows are within 0.01 percentage points; maximum absolute difference is 0.005 percentage points. September 2026 values match the reference at two decimal places. Only the mart calculation was corrected; attendance source and reference values were not changed.

September 2026 target findings

Measure	Department breaches	Finding
Attendance	3	D06 92.43%; D08 88.87%; D10 93.29% (target 94%)
Overtime share	2	Above departmental target
Attrition	2	Above departmental target
Task completion	0	No department with an available target below target

The executive scorecard reports 94.60% overall attendance with status Attention. Department-level breaches can coexist with an overall result above target.

Payroll reconciliation exceptions

D08 Finance & Accounts, May 2025: INR 61,813.15 difference associated with duplicate payroll records for EMP-0598 (PI-000761 and PI-X0002). D02 Product & Design, February 2026: INR 154,811.89 difference associated with duplicate payroll records for EMP-0194 (PI-004059 and PI-X0001). These exceptions are documented rather than silently adjusted.

Task 14 — AI Insights and Forecasts

The payroll anomaly mart matches fact_anomaly across all 11 reason codes, including source row counts and flagged counts. Source flag value is Y. Where money_at_risk is absent in the source, the mart reports zero.

Anomaly screening results

Reason code	Flags	Money at risk (INR)
STATISTICAL_OUTLIER	145	19,432,986.26
GROSS_ABOVE_NORM	13	9,417,924.27
GROSS_BELOW_EXPECTED	4	927,063.83
NEGATIVE_NET_PAY	8	909,114.81
ZERO_PAY	5	431,262.75
OVERTIME_ABOVE_CAP	8	272,767.51
PF_NOT_DEDUCTED	1	30,119.64
LONG_UNPAID_ABSENCE	43	0.00
FREQUENT_LATE	3	0.00
NO_ATTENDANCE	50	0.00
PATTERN_SHIFT	125	0.00

Important: anomaly categories can overlap. Monetary amounts are screening indicators and must not be summed as unique employee exposure or treated as confirmed fraud or errors. Investigate flags before taking action.

Forecasts

The forecast mart contains 72 rows: six overall monthly attrition forecasts and 66 headcount forecasts across 11 departments. The forecast horizon is October 2026 to March 2027, trained through September 2026. Model provenance is trend-seasonal-baseline-0.1.

Attrition uses the same-month average of the prior three years. Headcount uses a 36-month linear trend with half-strength seasonality. Forecasts are estimates, not actual results, and are labelled for human review.

Task 15 — Executive KPI Scorecard

The scorecard contains 144 rows: eight KPIs over 18 months from April 2025 through September 2026.

September 2026 snapshot

KPI	Actual	Target	Status / interpretation
Employer cost	INR 55,519,621.87	Not defined	No pass/fail target
Revenue	INR 80,601,695.00	Not defined	No pass/fail target
Net profit	INR 14,985,979.13	Not defined	No pass/fail target
Operating margin	18.59%	Not defined	No pass/fail target
Attendance	94.60%	94.00%	Attention
Overtime share	1.17%	1.50%	Attention
Monthly attrition	0.34%	1.00%	Attention
Task completion	85.65%	80.00%	On Track

Attendance, overtime share and attrition carry Attention because the scorecard incorporates department-level target breaches. Their overall values can meet targets while individual departments require review. Task completion is On Track. Employer cost, revenue, net profit and operating margin have no target defined; absence of a target is not a pass/fail result.

Quality controls and limitations

The Phase 3 marts contain 198 department-month rows, 18 monthly cash rows, 144 executive scorecard rows and 72 forecast rows. Attendance reconciliation passed for all 198 rows within the stated tolerance. Cash-in and cash-out reconciled to their source records across all 18 months. Anomaly source counts matched all 11 reason codes.

Seven automated ETL tests passed in the latest run. The documented payroll reconciliation exceptions, missing task coverage, manual journal review and model limitations remain visible rather than being concealed or converted into unsupported conclusions.

Dashboards

Dashboard	Charts
Receivables & Cash Dashboard	Ageing, cash movement, client payment speed
Department Performance Dashboard	Attendance, attrition, overtime share, task completion
AI Insights & Forecast Dashboard	Anomaly counts, money at risk, headcount and attrition forecasts
Executive Scorecard Dashboard	Monthly KPI actuals and targets

Review priorities: obtain Finance review of the INR 18,450 June 2026 salary-ledger difference; confirm the purpose and support for journal MJ-0002; investigate documented payroll duplicates; retain NULL task coverage as missing data; and review anomaly flags and forecasts with appropriate data owners.

Report scope: this document consolidates the five Phase 3 findings reports and the associated warehouse/dashboard validation results available on 3 November 2026. Forecasts are estimates and all unresolved reconciliation items remain disclosed.
